The Protego Difference

Our approach is to protect your organization using multi-layers of security, known in the security industry as Defense in Depth.

This approach entails wrapping layers of security protection through industry best practice controls, providing you peace of mind knowing your organization is Protego secured. Our approach can compliment your existing IT capability or be the sole assurance provider.

Partnering with Protego provides the following business benefits:

- Reduced Investment and Operating Costs compared to investing in security infrastructure and staff internally
- The use of the latest technology and Cloud delivery methods
- Knowledge and expertise collected over years of experience
- Experience working with global clients and Government
- Trusted staff holding Security Clearances and industry, CISA & CISSP certifications

Our suite of services provide continuous assurance to achieve and maintain our stringent level of security standards.

We commence with an initial security assessment and recommendations to mitigate any identified risks. This aims to address and achieve a baseline level of security. As your business evolves, we continue to monitor and assess your organization and invoke controls to address newly identified risks. Providing you complete, continuous and up to date protection and security coverage.

Protego protects you against threats 24 hours a day, 7 days a week, 365 days a year, anywhere in the world.
We have dedicated delivery locations around the world giving you global coverage to serve your needs.

London

Los Angeles

Sydney

Cloud Protection
